

Semaglutide

The **AFFORDABLE CHOICE**

Proven Weight Loss. Affordable Pricing.

What It Is?

Semaglutide is the active ingredient in **Ozempic®** and **Wegovy®**. It is a GLP-1 Agonist that mimics the hormone in your body responsible for lowering appetite.

The Goal

If you are hitting that goal on your current dose, we stay there to save you money and minimize side effects. We only move you up when the weight loss slows down.

The Results

LOSE 15%

Clinical trials show patients losing an average of **15% of their body weight.**

APPETITE CONTROL

Significantly **reduces hunger** and cravings.

BLOOD SUGAR

Improves insulin sensitivity for steady energy.

The Trade-Off

While highly effective and affordable, Semaglutide acts on the stomach and can cause digestive side effects (nausea, heartburn, or constipation) as your body adjusts.

* We start you on a low dose to minimize these symptoms.

Semaglutide
